

Blower function
keeps the cut line clean.

Soft start
allows for accurate landing of the blade on the surface of workpiece in various applications.

Soft no load speed
reduces the blade stroke at a no load speed of 3,500r/min (highest speed mode) for easy trace of cutting line.

Ergonomically designed handle with soft grip
Provides comfortable grip and more control while minimizing hand fatigue and pain.

Powered by 18V Li-ion batteries
High power density allows compact and lightweight tool design without power loss.
Can be charged at any time because Li-ion battery is free from memory effect.

Variable speed control by dial
located on the rear side for easier operation

Newly designed dust nozzle
Dust nozzle can be set to Base firmly with Thumb screw.

Front cuff is hard to fall out from the nozzle by corrugated shape nozzle end.

Dust nozzle is optional extra

Dust nozzle can be attached over the sawdust exhaust port for connection to Makita vacuum cleaner.

Cover Plate
Protects workpiece from scratches

3 Orbital settings + Straight cutting
Optimum cutting action can be selected by simply turning the change lever.

Rigid aluminum base
bevels 0 to 45° left and right.

Battery and Charger is NOT included

Cordless Jig Saw

DJV182ZK

Variable Speed

Brake

Orbital Cutting

Bayonet Shank Jig Saw Blade

Dust Collecting

Built-in Job Light

Carrying Case

Capacity	Wood : 135mm Steel : 10mm
Length of stroke	26mm
Strokes per minute (spm)	800 - 3,500
Dimensions (L x W x H)	266x77x208mm
Net Weight*	2.6kg (BL1830, BL1840) 2.4kg (BL1815N)

Cutting capacity in wood : when cutting with optional blade No.B-16L

Standard Equipment : Hex Wrench

*weight according to EPTA-Procedure 01/2003

Items of standard equipment and specifications may vary by country or area.

Cordless Jig Saw

DJV182ZK

Satisfy Professional's Needs

BL MOTOR

DJV182ZK

Top handle type

As powerful as corded Jigsaws, yet lightweight

Excellent Performance Provides High Productivity

Powerful BLDC motor

provides higher operating efficiency than that of the current BLDC motor, increasing max output power and work amount on a single full battery charge.

BL MOTOR

Top handle type

DJV182ZK 

Compact, Lightweight design

Top handle type

2.6kg (DJV182ZK)

DJV182ZK; with battery BL1840

Trigger switch with lock-on button

provides the same excellent operability as AC models

How to start the machine; Press Lock-off button once*1 and the machine will be turned into standby mode and LED job light will turn on. Then pull the trigger of Switch within 10 seconds*2 and the machine will start. For continuous operation, pull the trigger then push in Lock-on button.

How to stop the machine; Release the trigger of Switch to stop the machine. When the machine is locked in continuous operating mode, pull the trigger fully then release it.

Lock-off button

Trigger switch

*1: If you press Lock-off button once again within 10 seconds, LED job light will turn off and the machine will be automatically locked in off mode.
*2: If Lock-off button is not pressed nor the trigger of Switch is not pulled for 10 seconds after LED job light is turned on, the light will automatically turn off and the machine will be automatically locked in off mode.

Note: Trigger switch is disabled when the machine is locked in off mode.

LED job light (twin-light)

for illuminated operation

Toolless blade clamp

Blade can be attached with single action - simply by pushing it into the clamp;
can be also removed easily with single action - simply by turning large lever
